## SUMMARY

Full Stack Web Developer with expertise in designing and developing scalable web applications using modern technologies. Proficient in building responsive user interfaces, robust server-side logic, and optimizing database models. Adept at implementing secure authentication, CI/CD pipelines, and delivering user-focused solutions.

## EDUCATION

### Bachelor of Engineering in Electronics and Communication

2021-2025

Coimbatore Institute of Engineering and Technology, Coimbatore

## SKILLS

**Programming Languages:** C++, Java, JavaScript, TypeScript, Python, HTML, CSS, SQL, MongoDB

**Libraries & Frameworks:** React JS, Next JS, Node JS, Express JS, Socket.IO, Recoil, Bootstrap

**Tools & Platforms:** Git, GitHub, Docker, AWS, Turborepo, Linux, Vercel

## SELECTED PROJECTS

### 🔗 DevFlow - Developer Q&A Platform

2024

- Built a Stack Overflow-style platform enabling developers to ask and answer programming questions.
- Implemented secure user authentication and session management through Clerk.
- Developed modular components with Next.js and optimized database queries in MongoDB.

### 🔗 Real Time Chat Application

2024

- Developed a chat application supporting real-time messaging with React.js, Express.js, and Socket.IO.
- Implemented Recoil for efficient state management.
- Designed intuitive UI with Material UI for improved user experience.

### 🔗 N Tube - YouTube Clone

2023

- Designed a YouTube replica with React.js, Express.js, and Rapid API integration.
- Enabled users to watch, like, and save videos with SQLite-backed data operations.

## CERTIFICATIONS

React JS — NxtWave • Oct 2023

Node JS — NxtWave • May 2023

Introduction to Databases (SQL) — NxtWave • Mar 2023

## INTERESTS

Science fiction novels, music, developing software to explore new technologies, swimming.
